## SQUADRATO

**Piastrelle o lastre ceramiche portate a dimensioni predefinite, ognuna esattamente uguale all'altra (monocalibro) con sistema di mole abrasive. La precisione della lavorazione consente di posare i materiali accostati per realizzare ambienti nei quali i bordi di ogni singolo pezzo diventano invisibili nelle superfici posate.**

## SQUARED

Ceramic tiles or slabs made to a pre-defined size, each one exactly the same as the others (single size), using a system of abrasive grinders. The precision of the processing work means that the material can be laid without joints to create areas in which the edges of each tile become invisible in the laid surfaces.

## EQUARRI

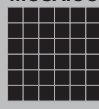

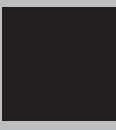

Carreaux ou dalles céramiques mises aux dimensions prédéfinies, parfaitement identiques l'une à l'autre (mono-calibre) grâce à un système de disques abrasifs. La précision du travail permet de poser les matériaux les uns à côté des autres afin de réaliser des espaces où les bords de chaque pièce deviennent invisibles sur les surfaces posées.

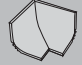

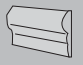

## VIERKANTIG

Fliesen oder Keramikplatten mit festgelegten Formaten. Alle Fliesen sind aufgrund der Verwendung des Schleifscheiben-Systems hundertprozentig identisch (Monokaliber). Durch die Fertigungsgenauigkeit können die Fliesen eng verlegt werden, um Räumlichkeiten zu gestalten, in denen die Ränder jeder einzelnen Fliese in der verlegten Gesamtfläche unsichtbar werden.

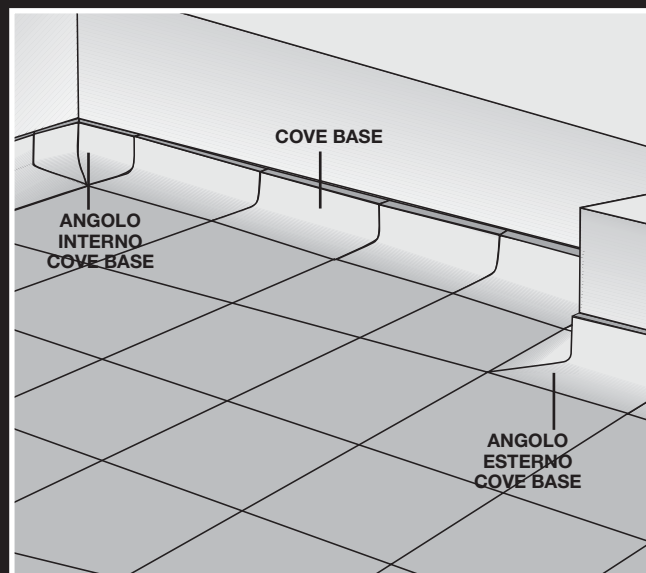

## ESCUADRADO

Baldosas o placas cerámicas fabricadas con dimensiones predefinidas, todas exactamente iguales (tamaño único), mediante un sistema de discos abrasivos. La precisión de la elaboración permite colocar las piezas tan juntas, que sus bordes resultan prácticamente invisibles al observar el conjunto de la superficie solada o revestida.
